

HEART-CENTERED CREATIVE EXPRESSIONS

The Number Codes for March

March 2016 is Three Universal Month and also the third month of the year. Thus we receive a double dose of the Three’s vibration which can be a most fortunate one. I call Three the “joy number” because it can relate to all the good happy things that make us glad to be alive. When we are focusing on the most positive potentials of this number, Three is the number of sunshine, celebration, socializing, creativity, playfulness and good luck

March’s (the word’s) Soul Number is One which prompts us to take a stand, act independently and/or initiate something new.

March’s (the word’s) Letter Sum is Seven, the number of spirituality and accessing information from the world of the unseen.

How March adds up:

This might be the easiest month of the year to transit in spite of some very notable cosmic activity with two eclipses and the Spring Equinox on the agenda. All of these have the potential to be very auspicious for us going forward into the rest of the year. They can assist us in releasing old, unproductive patterns, thus freeing us to take flight to our desired new directions.

Three is a number of joy and being aligned with our heart essence – also of springtime and sunshine, love, beauty and generosity. Wow! Don’t these sound yummy?

With Three the prevailing Universal energy this month, it is important to focus your thoughts and your words on the positive outcomes it can effect, because all numbers have a polarity. You don’t want to even consider what the negative aspects of Three could be. They are not pretty as they are the opposite of all that I mentioned above.
